Features

Tactical patterns for the real world: Validation and informational patterns **4**

Darrow Kirkpatrick

This series on patterns for working with domain models continues, with a focus on patterns for validating objects and for managing status and validation messages.

Equality versus identity **10**

Bobby Woolf

Experienced Smalltalk programmers know the difference between object equality and object identity—but what does it mean in terms of logical programming?

Columns

Deep in the Heart of Smalltalk **14**

The active life is the life for me!

Bob Hinkle & Ralph E. Johnson

Active variables allow programmers to monitor all accesses to object state on a per-object basis.

Getting Real **21**

Configuring server Smalltalk

Jay Almarode

Configuring and tuning multi-user, server Smalltalk systems is very different from tuning single-user client Smalltalk applications. The tools available for monitoring statistics can be invaluable in this process.

Managing Objects **23**

Beware the octopus

Jan Steinman & Barbara Yates

If your organization has system diagrams with a bunch of circles connected by lines to a central circle, it may not be ready for object thinking.
